- Anti-slip flooring
- Repair and joint seal applications

Zendec is a British resin flooring company based in the North East of England, providing our services in all areas of the UK. We are a family run company which have worked within the resin flooring industry, gaining over 30 years experience, in the application of screed and resin based systems. We work with the best resin flooring products and system manufacturers, using the latest resin flooring technologies. It is important for the performance and durability of a resin floor that the correct type of material is selected for the project. There are simple one-component paints and resin combination paints, which can be useful for application in limited wear and exposure situations, such as for waterproofing, dust-proofing and brightening up plain concrete or screeds. Higher performance, two component epoxy resin based materials can be used for sealing and improving the wear resistance and durability of trafficked floors. Zendec are pleased to offer advice concerning the selection of product for any specific project.

We have recently launched our brand new website, designed to provide a valuable resin floor and wall resource for all applications. Recent technological advances in the resin industry have provided us with the opportunity to launch our fresh new brand; 'Zenflec' which is now being used widely within the domestic market for projects such as wet rooms, kitchens and bathrooms.

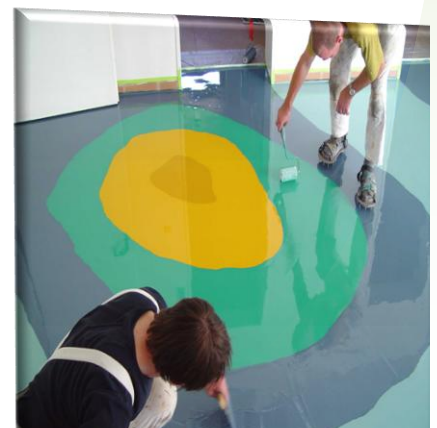

Commercial, domestic or industrial?

Decorative flooring and wall coverings can be achieved using many different techniques. We can incorporate almost every pattern, photograph, picture or logo into your design specification according to individual preference. There is a growing demand for domestic resin systems for use in kitchens, bathrooms, living and dining areas, along with external projects such as drive ways, garages and patios. Decroitive systems are ideal for bars, restaurants and washrooms. For heavy duty/industrial requirements, we provide a tough chemical resistant, impact and abrasion resistant floor, with long term durability.

Over the last ten years resin technology has moved forward a great deal. What used to be solely for an industrial setting due to the cost and colour availability, is now available in wide range of colours for retail and domestic projects

Our resin flooring systems are designed to reflect your business, home and personal individuality. The application of resin floor systems is a specialist trade, installed by specialist contractors; in which we have over 15 years experience. We install resin floors in almost every type of industrial, commercial and domestic building/facility. These resin systems provide cost effective and durable solutions for any surface, indoors or out, and are completely watertight. Our seamless flooring systems are available in infinite colour and texture combinations (see our colour chart) and are also available with various surface finish options. It has many advantages over other flooring solutions due to the low maintenance requirements, easy cleaning and durability.

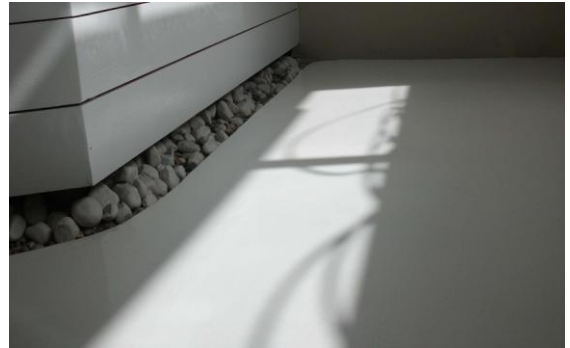

APPLICATION MANAGEMENT

Combined with our integrated team of specialists, we will provide you with products and services tailored to specifically meet every element of your project. All of our floors are designed to our client's brief and budget, from initial concept to completion.

By creating floors and walls of individual character and quality, we provide our clients with excellent value for money without compromise on quality or service.

Durable Resin Solutions

Incorporating your inspirations

COLOURS STYLES & DESIGNS

All of our systems are available with a mat, silk or high gloss finish and can be applied to almost any surface. Plain colour choices are available to select from our colour chart, although RAL chart colours are also available. We can also match a required colour on request. These colours are also used as a base coat when used with our fleck system.

Paint fleck

Fleck systems consist of coloured paint flakes combined with a base coat of resin paint. A clear resin, water-proof seal is applied as a top coat, ensuring the desired finish.

Metallic fleck

Metallic fleck systems consist of a coloured resin base coat, and clear seal coat which is applied to coloured, shiny aluminium flakes to give a truly dazzling effect.

Metallic blends

Blend systems consist of coloured paint flakes and coloured aluminium flakes combined with a base coat of resin paint and clear resin seal coat.

Some of the colours and blends can be found in our colour charts and a larger selection is available to choose from in our web site galleries. These should be used as a guide only. We can match a chosen colour on request and are happy to assist you design you own unique blend to suit your project. Pearlescent blends give optical effects to serve decorative purposes. All of our colour combinations are available with pearlescent flakes on request.
